

# Opal Glass Block

Imagine the possibilities with the new Opal Glass Block! This unique glass block provides a new look to your designs with all of the traditional benefits of glass block. Daylighting with a level of privacy that only Opal Glass Block can provide with two patterns to choose from ...exclusively, from Pittsburgh Corning.

## Soft and Soothing

Opal fills the space with soft opalescent white light. Opal can be used in exterior and interior applications to provide light and privacy and create a pleasant, soothing atmosphere. Opal also provides the same basic benefits of ordinary glass block by creating sound insulation, security, graffiti resistance and easy maintenance. Opal can be installed like traditional glass block.

Opal softens the light during the day yet still makes use of the late afternoon light by welcoming it into the room. Opal would be a welcome addition to libraries, hospitals, and schools as well as residences and public buildings. It combines the functional security of glass block with the beauty of an opal-like appearance.

## Physical & Design Data

<b>Size</b>	8" x 8" x 4" (nominal)
<b>Patterns Available</b>	<p><b>Plain</b> – With a smooth finish both inside and out, this style emits a softly diffused light over an entire area.</p> <p><b>Silk</b> – This fine grid pattern on the inner surface provides an elegant setting as it gently spreads light.</p>
